MOSAIC

PRODUCTS

(*Pages referred to are in this Mosaic Tile Section*)

Mosaic Tiles are in every respect high quality products, made by one of the largest, oldest and most modernly equipped plants in the industry.

FAIENCE (*pages 2-9*)

For floors and walls, both exterior and interior, also decorative uses. Plastic made, extremely hard-backed, thoroughly hand-wrought character.

Decorative Faience (*page 2*)

Fountains and Mantels (*page 3*)

Faience Mosaics (*page 9*)—Mosaic sizes in Faience colors.

Dustprest Faience (*page 6*) is a machine-made tile with rounded edges glazed in beautiful new distinctive glazes. This material is especially attractive for bathroom walls when Mosaic Faience is not desired.

Adobe Tile (*page 5*) is a plastic made tile with dull finish mottled glazes. This tile is available in a number of pastel shades being suitable for some types of mantels and fountains.

WALL TILES (*pages 10-13*)

Satin Finish Matts (*pages 10, 11, 12*) are wall tiles having a soft glare-free satin-light finish. These pastel colors have a pleasing variation which produce very beautiful wall surfaces.

Mozane Enamels (*page 13*)—Highly serviceable, economical, bright glazed tiles for walls.

Duratile is a hard body glazed wall tile suitable for use in subways, refrigeration plants, kitchens, power plants, etc. It has been developed to meet very rigid standards of durability and sanitation.

Decorative Wall Borders (*page 14*) are of the inlaid type and printed designs especially made for use with Satin Finish Matt and Mozane Enamel wall tiles.

FLOOR TILES, other than Faience (*pages 10, 11, 13, 15, 17, 18 and 19*)

Vitromat (*pages 10, 11*)—Glazed vitreous and semi-vitreous tiles in same colors as Satin Finish Matts.

Ceramic Mosaics (*pages 10, 11, 13, 15 and 17*)—Wide range of designs, colors and shapes, in several textures. Include Aventine Ceramics, Velvetex Ceramics, Rhombic Designs, Non-Slip and Granitex Ceramics.

Flint Floor Tiles (*page 18*)—An unglazed type for severe wear.

Ironstone and Bluestone (*page 19*)—Plastic made, unusually hard and durable, in soft colors, which give rich effects. Sizes up to 12 x 12. Also in small "mosaic" sizes.

BATHROOM ACCESSORIES—All Tile (*page 14*) include such fixtures as Towel Brackets, Soap Dishes, Tumbler Holders, Heaters and Light Fixtures, furnished in Satin Finish Matt, Faience, Mozane Enamels and Dustprest colors and also in White Glaze.

SWIMMING POOL DESIGNS (*page 16*) include several practical types of Scum Gutter treatments and color schemes. We are experts in the handling of swimming pool projects.

TRIM TILES—Bisque body glazed trims and vitreous and semi-vitreous trim tiles (*page 20*).

Faience Station of the Cross Panel

This is one of a group of fourteen panels depicting the Stations of the Cross in natural colors. The panels are modeled very artistically and are 20 in. by 30 in. in size.

To Specify Mosaic Tiles

Architects who want to make sure that Mosaic Tiles are used, should include in their specifications some such wording as, "tile work shall be of Mosaic Tiles manufactured by The Mosaic Tile Company, of Zanesville, Ohio." Also ask for a certificate of quality.

We also suggest the short form of the Associated Tile Manufacturers, which incorporates Basic Specifications for tile installation.

Grade Standards and Identification

"Mosaic tiles are graded and the containers grade sealed to comply with the requirements of the United States Department of Commerce Simplified Practice Recommendation R-61-30. Master grade certificates, enumerating the contents of each container, will be furnished when requested."

FOUNTAINS AND MANTELS IN MOSAIC FAIENCE TILES

Faience Drinking Fountain Design No. 538

This drinking fountain is very practical for use in corridors of schools, office buildings and other public buildings and is very attractively decorated. The colors used in decorating this fountain may be changed to suit the surroundings using any of the extensive group of Faience colors.

Mosaic Faience Tiles are ideally adapted to the creation of outstanding fountains. Their wide range of colors allows any color scheme to be followed. The beauty of the glazes is rich and lasting. The tiles are impervious to moisture, heat and cold. A large variety of other designs is available.

Faience Fountain Design No. 539

This Faience wall fountain would make an attractive feature for any garden or solarium. The Mosaic Faience material is impervious to all elements and is practical for either exterior or interior use. This fountain as well as other fountains illustrated in our catalogue is obtainable in any of the Faience colors or can be furnished in Mosaic Adobe colors which are soft pastel glazes.

Mantel Design No. 440

Mantel, 6 ft. wide; height variable to ceiling. Fire opening, 2 ft., 7½ in. wide; 3 ft. high. Top ornamental feature No. 2781. Hood panel No. 3237. Hood moulding No. 2782. Side panels, 6 x 3 tiles, No. 3238. Plain faience tiles, 4¼ x 4¼ in. No. 316 mottled brown, No. 2010 mottled red and other colors.

At right, Mantel Design No. 409

This design can be furnished with fireplace opening in the following widths: 30 in., 36 in., 42 in., and 48 in. The color shown is No. 388 buff in Mosaic Faience, but this mantel is equally appropriate in grays, browns and several other shades.

Baked to extreme hardness by the intense heat of fire itself, Mosaic Faience Tiles are naturally appropriate and practical for mantels and fireplaces. And no material is more beautiful, colorful and lasting. A wealth of Mosaic Mantel Designs is offered, or individual designs will be painstakingly executed.

TYPICAL MOSAIC FAIENCE FLOOR DESIGNS

Faience Floor Design No. 529

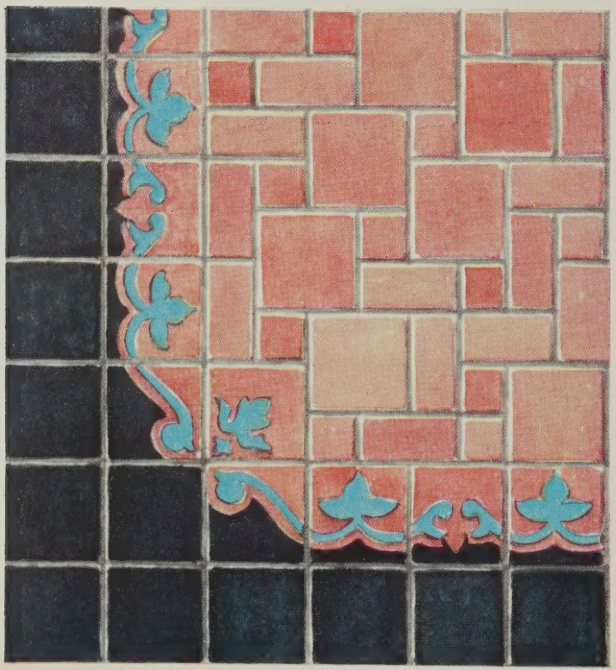
Reproduced from Tile

An interesting example of random floor treatment in green, olive and brown tones. Sizes of tile used in field: 6 x 6, 6 x 3 and 3 x 3 in colors No. 334 and No. 3151. In the border 3 x 3 tiles are used, color No. 316, with decorative insert in pattern No. 3081, decoration No. 2678. Marginal tiles are 6 x 6 in color No. 3151.

Faience Floor Design No. 531

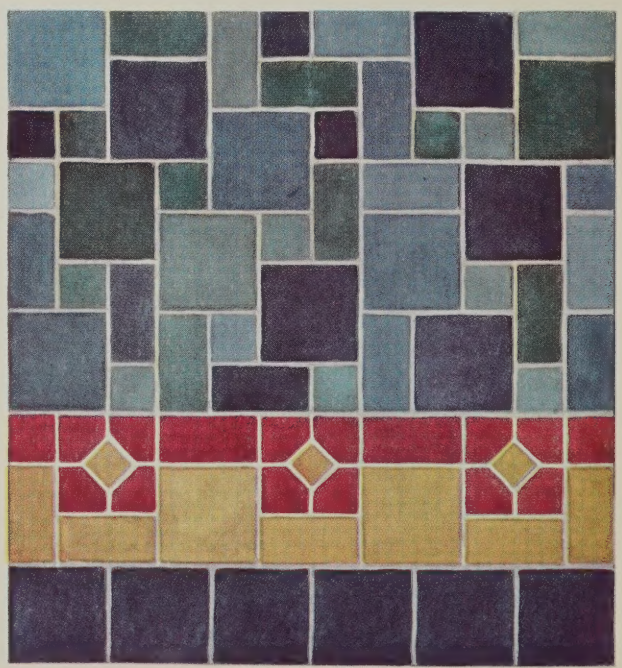
Reproduced from Tile

A monochrome treatment effective for porches, vestibules, sunrooms, conservatories, courtyards, etc. Random field in sizes 6 x 6, 6 x 3 and 3 x 3. Margin of 6 x 3 tiles. Color is No. 2010 red mottled. Oak leaf border is 6 x 3, pattern No. 4026, decoration No. 2365.



Floor Design No. 540

This floor is composed of an Ironstone field in a random design of 6 x 6, 6 x 3 and 3 x 3 sizes. The margin is of Faience, as is also the ornamental border. A floor of this kind is very practical for spaces subjected to heavy traffic. Mosaic Ironstone is an unglazed very hard floor tile having a pleasing variation and irregularity.



Faience Floor Design No. 541

This is an attractive Faience floor treatment with the field in a random design using 6 x 6, 6 x 3 and 3 x 3 tiles in various Blue Matt glazes. The Border is of tan color 316 and rose color 397. The beauty and everlasting quality of Mosaic Faience tile provide unlimited possibilities for distinctive and decorative floor treatments.

MOSAIC FAIENCE TILES FOR FLOORS AND WALLS

Entrance Hall. Faience Floor Design No. F-5609

Distinctive effects in entrance halls are secured with Mosaic Faience Tiles. The floor at the left, design No. F-5609, shows a random design of Faience tile in sizes 6 x 6, 6 x 3 and 3 x 3, in a mixture of green shades. The border and base are of 6 x 6 decorated Faience, pattern No. 3002, decoration No. 2535. The wall fountain is No. 308.

Character of Mosaic Faience Tiles

Mosaic Faience Tiles are plastic made, with a red or buff body. They are highly glazed in bright and dull finishes and possess the true characteristics of hand-wrought tiles, a fact evidenced in their slight irregularities of shape and size, which accentuate their craftsmanlike quality. They are, therefore, the highest type of tile, aristocrats of the tile world, and as such produce rich treatments both on exteriors and interiors. Mosaic Faience Tiles have also the feature of being extremely hard-backed, which makes them unusually resistant to wear and the effects of time and weather. To specify Mosaic Faience assures you of obtaining genuine Faience tile.

Sizes of Mosaic Faience Tiles

Mosaic Faience Tiles are made in all standard tile sizes, such as the following examples:

6x6	6x4¼	6x3	3x3	4¼x4¼
4¼x2	2x2	9x9	12x12	12 x 6

Special sizes and special shapes can also be furnished in Mosaic Faience.

Bathroom at Right—Modern Faience Design No. 542

This attractive treatment may also be carried out with Satin Finish Matt wall tile, Mozane Enamel or Dustprest Faience

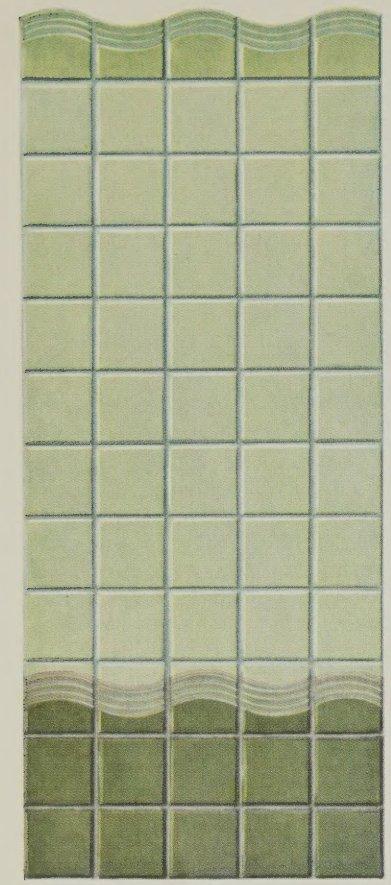
The bathroom illustrated at the right is a modern Faience Design No. 542. This attractive bathroom treatment has features of design which make it distinctive. Slight changes in the treatment or in the color scheme can be easily made. Luxurious effects in bathrooms are easily attained with Mosaic Faience tile, due to the wide selection of colors and designs. The modern decorated inserts are of special interest. This bathroom treatment can also be carried out with other types of Mosaic tile such as Satin Finish Matt wall tile or Dustprest Faience.

Mosaic Duratile

Mosaic Duratile is produced in 4¼ in. size only and in White, Tan and Red, although other colors can be produced when required. This material has a nearly vitrified body being very hard and durable and satisfying a demand for a glazed wall tile which can be used in places such as subway walls, creameries, kitchens, lavatories, power plants and other commercial work where beauty and durability are required.

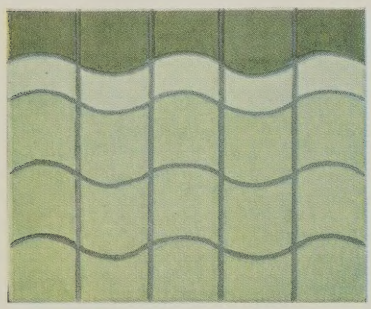
Mosaic Adobe Tile

Adobe tiles are plastic made with colored slip glazes and dull finish mottled colors. The soft pastel shades of this material make it very suitable for carrying out Spanish treatments and other types of mantels, fountains and wainscots. Adobe tile is not suitable for floor use although it is sufficiently desirable for all other purposes and Ironstone, Bluestone and Granitex floor tile can successfully be used in rooms with Adobe wainscoting.



Wall Design No. 543

4¼ x 4¼ Dustprest Wall tile in color 6005 with M-464 4¼ x 5 Cove Base in color 6007 and Caps C-221 and C-222 in color 6006.



Floor Design No. 544

A modern floor treatment in a new design of Faience tile. This color scheme and treatment is made to harmonize with the Dustprest Faience wall design above.

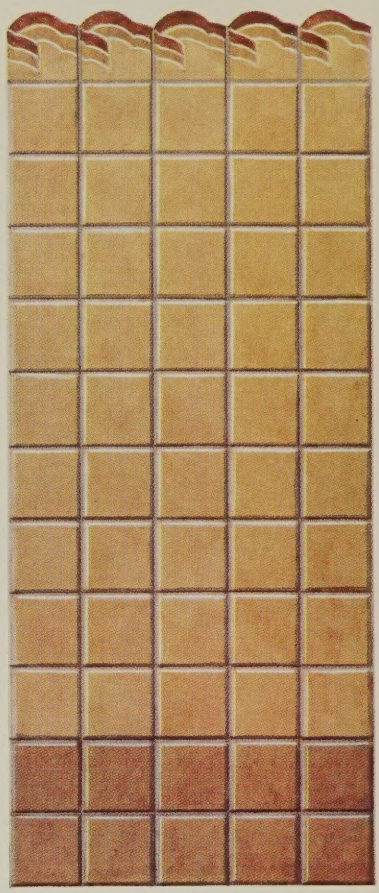
MOSAIC DUSTPREST FAIENCE

Buff Body Cushion-face Wall Tile
New Distinctive Glazes

Mosaic Dustprest Faience is a new development in the tile industry as are also the newly developed cap designs used in the panels on this page. Dustprest Faience is a machine made tile having slightly rounded edges giving it a cushion face and causing each unit to more noticeably stand out when installed in a wall. It is essentially a wall tile being suitable for bathrooms, corridors, restaurants and other spaces of this kind. Regular Faience Caps, Bases and Decorative Borders will be found suitable for use with Dustprest Faience and Faience, Vitromat or Flint floor tile may be used.

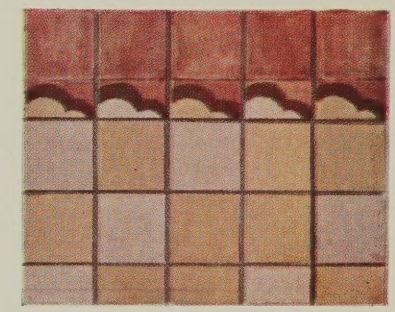
Illustrated below are the fifteen beautiful and distinctive colors in which Dustprest Faience is offered. These colors were produced with the definite idea of providing many pleasing and harmonious color combinations. Dustprest is the highest type of machine-made wall tile and produces effects only slightly less artistic than treatments of Mosaic hand-made Faience tiles.

The many designs and color schemes illustrated on this page and other pages in this catalogue illustrate the wide scope and flexibility of real tile as a decorative medium and as a practical surfacing material for floors and walls of practically all types of spaces. Designs in Mosaic tile are not limited to any predetermined pattern. The Architect is allowed a wide scope for the expression of his own individual ideas. Our Art Department will gladly offer suggestions of the practical type of Mosaic tile correctly designed for any purpose.



Wall Design No. 545

4¼ x 4¼ Dustprest Wall tile in color 6015 with M-464, 4¼ x 5 Cove Base in color 6012 and Cap C-223 in colors 6012, 6013 and 6015.



Floor Design No. 546

A Faience floor design of modern spirit to harmonize with the Dustprest Faience wall. The possibilities for distinctive designs and color schemes are practically unlimited in Mosaic Faience tile.

Chart of "Dustprest" Colors

Special designs to fit any period architecture and to incorporate the architect's ideas can easily be created by experienced craftsmen with the wide variety of Mosaic products.

Tile treatments can be originated to correspond to the period architecture of a residence or public building. Mosaic products include decorative materials of modern style as well as period designs and the many sizes, colors and shapes provide unlimited possibilities.

FAIENCE MOSAICS FOR WALLS AND FLOORS

Faience Mosaics are made in small Ceramic sizes of the same material and with the same characteristics as the larger Faience tiles. Most of the Faience colors are obtainable in Faience Mosaics so that a wide range of color combinations is available. This material is produced in the 2 x 2, 2 x 1 and 1 x 1 sizes only and it is ⅜ in. thick. Faience Mosaics are mounted on paper for easy installation, the same as Ceramic Mosaics so that the richness and beauty of the Faience colors may be utilized at a slightly more conservative cost. Very attractive wall treatments can be carried out in this material as the small units enable a wide scope for design and it is especially practical for swimming pools, entrance and corridor wainscoting, fountains and store fronts. Attractive floor designs for use with Mosaic Satin Matt wall tile or Dustprest Faience wall tile can also be produced as well as decorative panels and borders for any surface where colored glazed tiles are desired.

Faience Mosaic Panel Design No. 547

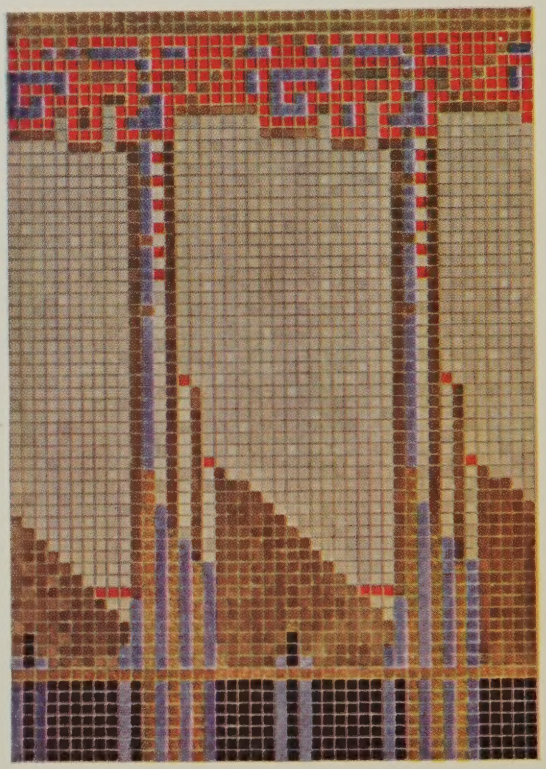
This panel shows the wide possibilities for design in Faience Mosaics and also the beautiful rich colorings available. The panel is composed of 1 in. squares depicting a modern marine scene. A panel such as this is suitable for decorative purposes in many types of spaces and especially in the tub recess of a modern bathroom. This is only one of the many designs possible with Faience Mosaics and special designs can be easily developed to suit individual ideas.

Faience Mosaic Wall Design No. 548 (at right)

1 x 1 Faience Mosaics are used to produce this striking and modern wall treatment. A design such as this is extremely suitable for the entrance lobby or corridors of hotel buildings or office buildings and it merely illustrates the many possibilities attainable with Faience Mosaics. Ceramic units such as the 1 in. squares illustrated permit unlimited scope for design and artistic wainscot treatments can also be produced in the regular unglazed *Ceramic Mosaic* material.

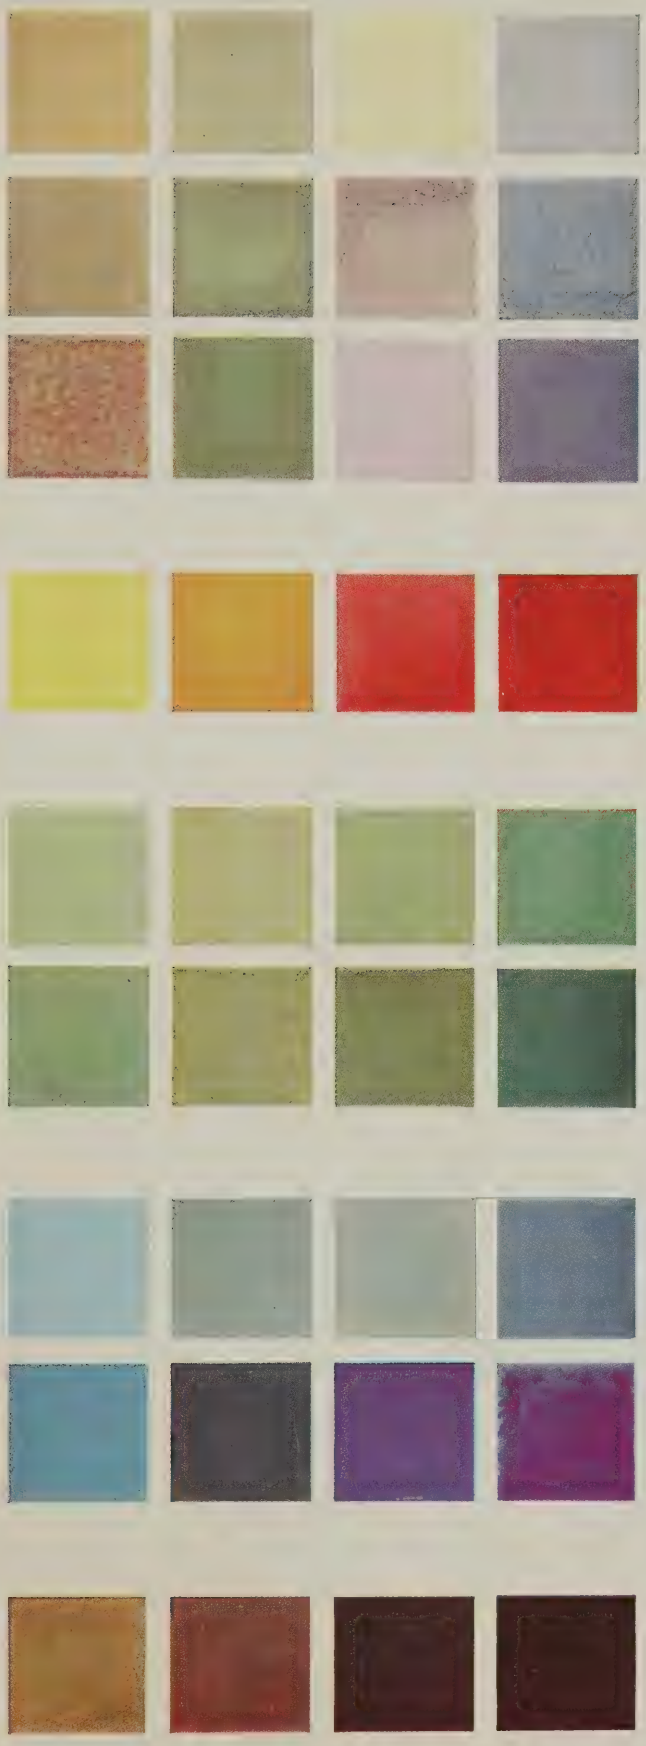
Glazed Ceramic Mosaics (¾″ sqs. only)

Panels such as the one illustrated on this page and also attractive wainscot treatments can be carried out in ¾ in. squares glazed Ceramic Mosaics at slightly less cost than the Faience Mosaics. The regular glazed Ceramics, of course, do not possess the beauty and unlimited range of colors obtainable in the Faience Mosaic material. Most of the Satin Matt colors are available on the ¾ in. Ceramic tiles, providing dots for use in the unglazed Ceramic floor designs and also being suitable for wall treatments. The ¾ in. squares are also available in the new crystal glaze which is a clear glaze placed over the regular Ceramic colors, producing a very bright durable glazed finish. This material is very practical for use on drainboards, counter tops, store bulkheads, as well as interior wainscots. Special designs can easily be arranged.



Faience Mosaic Wall Design No. 548

COLOR CHART OF MOSAIC FAIENCE TILES



Reproduced from Tile

THE range of colors in which Mosaic Faience Tiles may be obtained is almost unlimited. The chart on this page is a representative selection indicating the wide scope of effects at the command of the architect in working with Mosaic Faience.

All Faience glazes are subject to variation of shades and texture. The beauty of Mosaic Faience Tiles is in large part due to these variations, which give to the tiles a desirable warmth and softness of tone.

These variations, although natural to the process of production, are not great and when tiles of different shades are properly blended, they are in *perfect harmony*.

MOZANE ENAMEL TILE FOR WALLS

Wall Design No. 567

Mozane Enamel wall tiles have been developed to supply the demand for a durable colored wall tile in bright glaze finish. They are manufactured with a buff clay body peculiarly adapted to these beautiful glazes and enabling them to provide very satisfactory service such as has not been possible with enamel wall tiles in the past.

This material is available in 4¼ x 4¼ and 6 x 3 sizes, ⅜ in. thick and in practically all our popular trim tiles such as C-218 cap, B-103 Base, etc. All-Tile accessories are also supplied in these colors.

Mozane Enamel tiles offer a pleasing variation from white glaze installations and are especially practical for bathrooms, kitchens, apartment buildings and wherever effectiveness and utility are required at a moderate price.

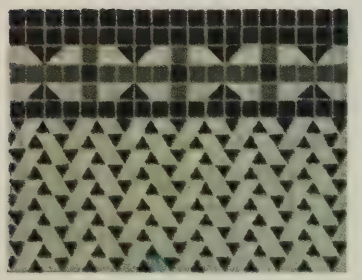
Description of Wall Design No. 567

This attractive wall treatment is composed of Mozane Enamel wall tile color J-196 light green in the 4¼ x 4¼ size with C-218 cap and B-103 base in color No. 027 Egyptian Black Enamel. A Mozane decorated border is illustrated below the cap and above the base.

Description of Wall Design No. 568

Mozane Enamel wall tile color J-143 light oatmeal is illustrated in the above panel with the trim tiles in color No. 0404 Sienna Brown. The Mozane decorated borders are used to enliven this treatment. This color has been especially popular for Schools, Office Buildings and other commercial installations.

Wall Design No. 568



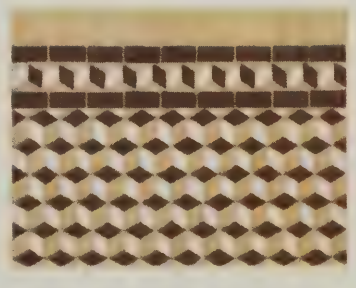
Ceramic Floor Design No. 569

Description of Ceramic Floor Design No. 569

This attractive design has been created by the use of 2⅜ x 1⅛ Rhomboids and 1⅛ triangles using a combination of celadon and black unglazed Ceramic tiles. The border is of 1⅛ squares in the same colors.

Description of Ceramic Floor Design No. 570

A modern design composed of 1⅛ diamonds arranged to produce a vanishing block effect. The colors are black, buff and cream which combination is in harmony with the No. 568 wall design.



Ceramic Floor Design No. 570

COLORS

There are ten beautiful colors in the Mozane Enamel group, as shown by chart below.

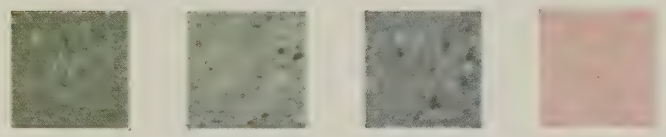
VELVETEX CERAMIC COLORS



No. 201 Dk. Green | No. 202 Lt. Green | No. 203 Blue | No. 205 Pink

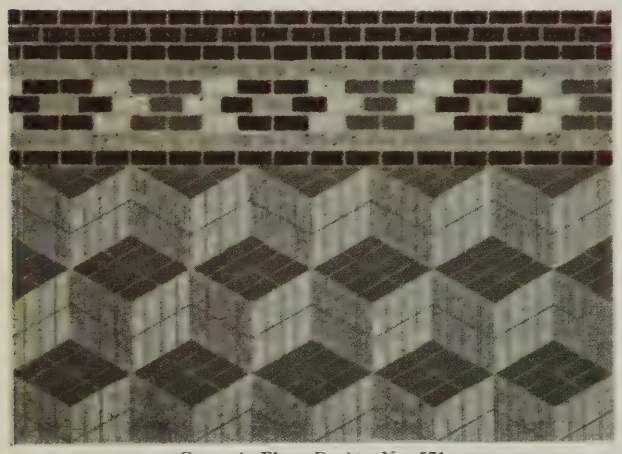
Ceramic Mosaic tiles as manufactured by the Mosaic Tile Company are small unglazed tiles in square, oblong, hexagonal, triangular, rhomboid and diamond shapes supplied in a wide range of vitreous and semi-vitreous colors as charted above.

Ceramic Mosaics are furnished in a variety of floor designs, each design being produced in any color combination desired to suit individual tastes and requirements. A number of attractive designs suitable for bathrooms, corridors, entrances and public buildings are illustrated below and elsewhere in this catalog. Ceramic Mosaics offer a wide scope for designs and special designs can easily be arranged to suit the architect's ideas and any style of architecture.

The Mosaic Ceramic line includes Aventine Ceramics which are reproductions of Roman patterns, Velvetex ceramics which are pastel colors particularly adapted for use with Satin Matt wall tile, Granitex ceramics which are non-slip texture tiles in tans and browns and the non-slip tiles containing a carborundum aggregate. (*See page 17*).

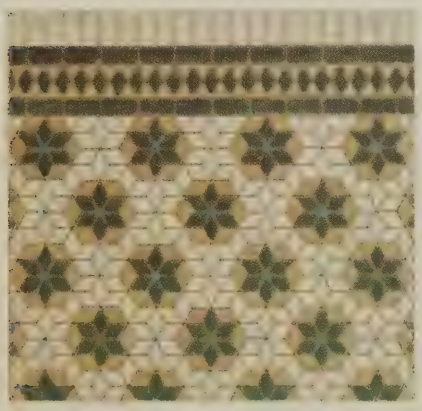
Ceramic Mosaics are available in the following sizes: 1$\frac{9}{16}$ squares, 1$\frac{9}{16}$ x $\frac{3}{4}$, 2$\frac{3}{16}$ x 1$\frac{1}{16}$, 1$\frac{1}{16}$ squares, $\frac{1}{2}$ squares, 1″ hexagons, 1$\frac{1}{4}$″ hexagons, $\frac{11}{32}$ squares, $\frac{3}{4}$″ squares, 2$\frac{3}{16}$ squares, 1$\frac{1}{16}$ x $\frac{1}{2}$, 1$\frac{1}{16}$ triangles, 1$\frac{1}{16}$ diamonds, 2$\frac{3}{16}$ x 1$\frac{1}{16}$ rhomboids.

A few attractive modern designs of Ceramic Mosaic Tile illustrating the possibilities of this moderate priced floor material

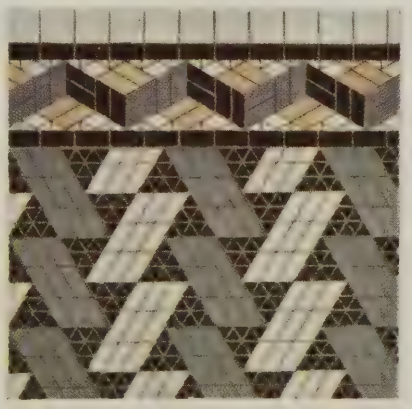


Ceramic Floor Design No. 571
A modern Rhombic design using 2$\frac{3}{16}$ x 1$\frac{1}{16}$ Rhomboid tiles in No. 201 dark green Velvetex, No. 202 light green Velvetex, and green. This design would be very practical for Entrances, Restaurants, Tea Rooms and other spaces where a modern treatment is desired.

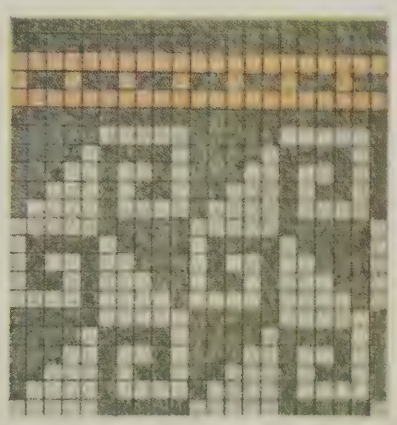
Ceramic Floor Design No. 572
This attractive design is a development of the staggered check pattern providing a floor suitable for Entrances, Corridors and similar spaces. It incorporates 2$\frac{3}{16}$ in. squares and 1$\frac{1}{16}$ in. squares in black, red, buff, salmon and chocolate.



Ceramic Floor Design No. 573
A Rhombic design incorporating 1$\frac{1}{16}$ in. diamonds in a star pattern. Colors used are cream, celadon and buff.



Ceramic Floor Design No. 574
This modern design is composed of 2$\frac{3}{16}$ x 1$\frac{1}{16}$ Rhomboids together with 1$\frac{1}{16}$ triangles in an attractive color combination of light gray, dark gray, black and buff.



Ceramic Floor Design No. 575
A conventional yet attractive floor treatment using 1$\frac{1}{16}$ squares in unglazed ceramic colors buff, No. 201 dark green Velvetex and No. 202 light green Velvetex.

CERAMIC MOSAICS IN SWIMMING POOLS

Natatorium and Pool Design No. 576

The illustration above shows a colorful, yet practical, Natatorium treatment which can effectively be carried out with Mosaic products. White ¾ in. squares Ceramic Mosaics unglazed are used for the lining of the pool with colored ceramic tile for borders and markings. The floor is of 1 1/16 in. squares Granitex non-slip and the wainscoting is of suitable Satin Matt wall tile colors. Mozane Enamels, Dustprest Faience or regular hand-made Faience tiles can also be used to carry out the wall treatment.

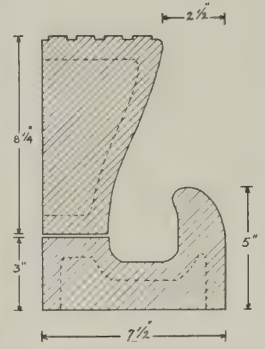
Advantages of Ceramic Mosaics for Pools

Ceramic Mosaics are a preferred material for swimming pool and natatorium construction on account of the beautiful effects obtainable, sanitary qualities, non-absorbence, imperviousness to wear and economy of upkeep.

The mounting of Mosaic Tile Ceramics insures even jointing and close fitting of contours and corners. Unglazed ceramics in ¾-in. squares, white, are most widely used for the pool, because of low cost, rapidity of installation and durability.

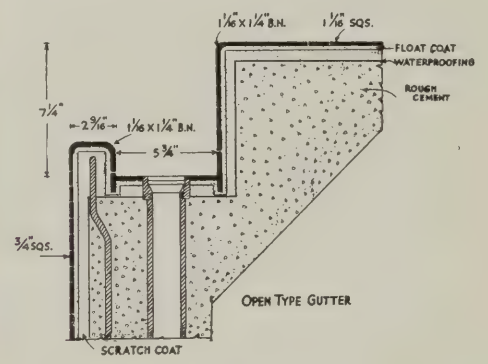
Colors are generally used for numerals, swimming lines, hand rails, etc., and frequently for the entire field of the pool. *Non-slip Granitex Ceramics are ideal for runways, gutters, stairs, etc.*

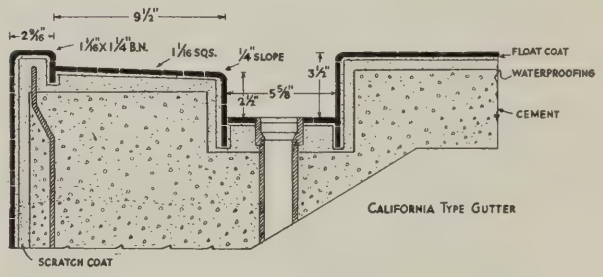
Sections of Practical Pool Gutters

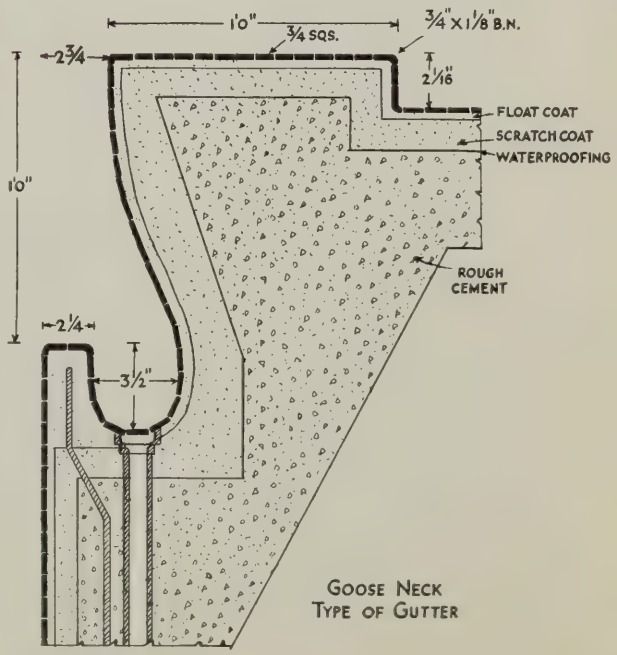


A Two-Piece Faience Gutter

The gutter treatments illustrated below have been developed through years of experience in swimming pool construction. Special treatments can be created and executed to suit specific requirements.







NON-SLIP CERAMIC MOSAIC FLOOR TILE

Mosaic Granitex Colors

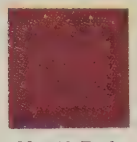
Buff Granitex

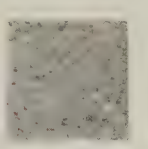
Non-Slip Ceramic Mosaic Tiles

With Carborundum Aggregate

No. 61 Black



No. 63 Red



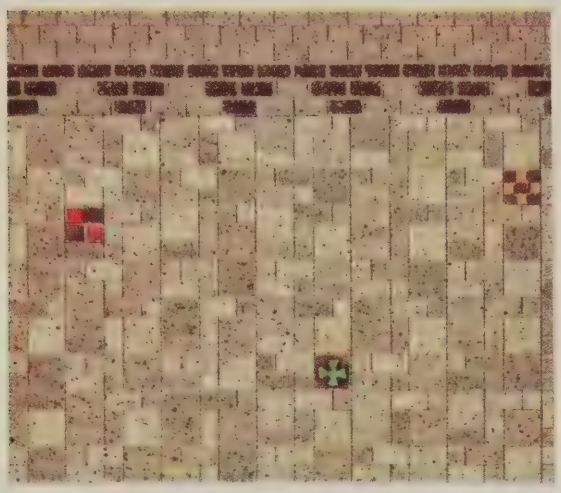
No. 31 Gray

No. 32 Gray White

The Non-Slip Ceramic Mosaic colors illustrated above have pronounced non-slip qualifications which make them extremely suitable for use on Runways around Swimming Pools, Lobbies and Entrances of public buildings, Theatre Entrances and for floors of this type subjected to heavy traffic.

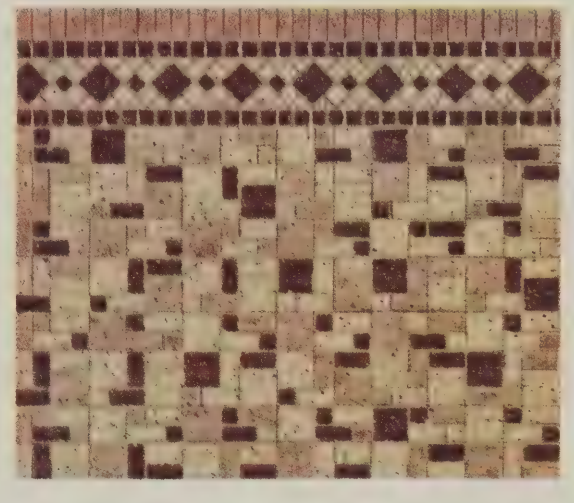
The Granitex Ceramic Mosaics have a stippled or granite effect and a slightly rough texture which provides the non-slip feature and produces a very attractive appearance. These colors are non-absorbent and vitrified and are supplied in 2 3/16 in. squares and 2 3/16 x 1 1/16 and 1 1/16 in. squares. The Granitex colors can be combined with regular ceramic colors or the carborundum non-slip tiles to produce attractive designs.

The non-slip Ceramic Mosaic tiles with carborundum are the regular ceramic colors to which the corborundum abrasive material has been added making them extremely non-slip and at the same time very durable. This material is produced in 3/4 squares, 1 in. hexagons, 1 1/16 squares and 1 1/4 in. hexagons and other sizes on demand for special jobs.



Granitex Ceramic Floor Design No. 577

This design is a random pattern composed of 2 3/16 in. squares, 2 3/16 x 1 1/16 and 1 1/16 in. squares, incorporating colors No. 1221 tan Granitex, No. 1223 buff Granitex with scattered 2 x 2 Faience inserts. These inserts are made 3/8 in. thick especially for use with Ceramic Mosaic tile.

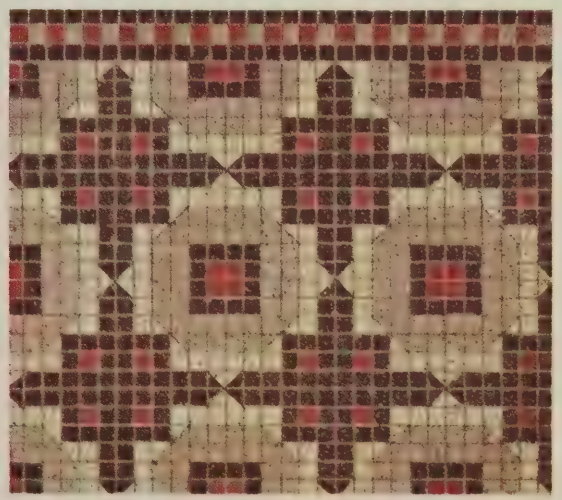


Granitex Ceramic Floor Design No. 578

A striking random pattern incorporating 2 3/16 squares, 2 3/16 x 1 1/16, and 1 1/16 squares in Granitex colors No. 1221 tan Granitex, No. 1223 buff Granitex and No. 1222 brown Granitex.

Granitex Ceramic Floor Design No. 579

A design of 1 1/16 squares, straight joint, providing a conventional pattern suitable for large spaces. The colors combined in this design are No. 1221 tan Granitex, No. 1223 buff Granitex, Salmon, Red, Chocolate and Black.



Granitex Ceramic Floor Design No. 580

This modern pattern is developed with the use of 1 1/16 squares and diagonal halves in a combination of salmon and the Granitex colors No. 1221 tan, No. 1222 brown and No. 1223 buff.

COLUMBIA UNIVERSITY

MOSAIC FLINT FLOOR TILES

Unglazed vitreous and semi-vitreous paving floor tiles (extremely durable)

Public Building Interior Showing Flint Floor Design No. 581

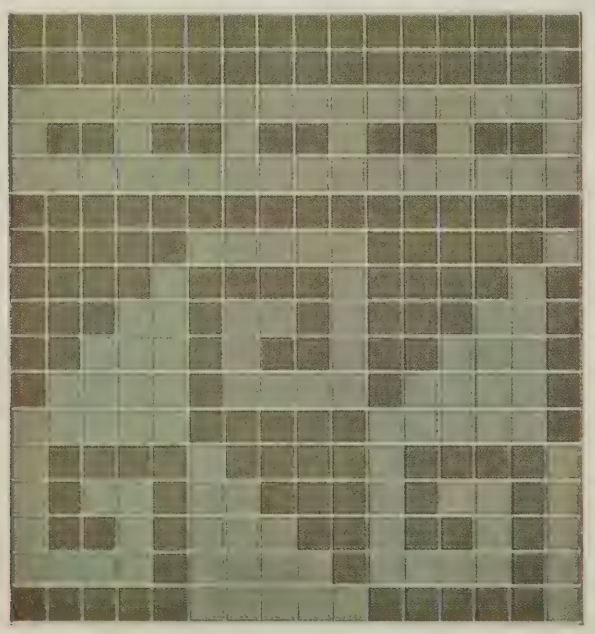
This pleasing design incorporates 6 x 6 Flint floor tiles in the three shades of Granitex colors No. 1221 tan, No. 1222 brown and No. 1223 buff.

This design is modern in effect and would be especially practical for buildings such as Post Offices, Banks and Courthouses. Material such as Granitex floor tile would be very suitable as also would any other of the Flint colors and the design might be carried out in other Flint sizes as well as the smaller ceramic Mosaic sizes.

Mosaic Flint floor tiles are unglazed vitreous and semi-vitreous tiles which are highly resistant to wear and impervious to moisture or liquids of practically every description. This material is the highest type of floor tile obtainable for public buildings, corridors and stair treads and other places subjected to severe wear.

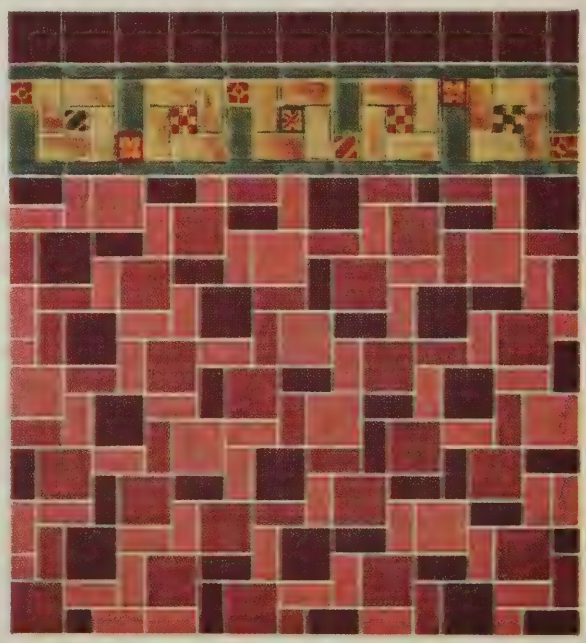
The vitreous colors such as white, light gray, gray granite, green, etc., are acid resisting and will withstand every test including the severe ink test as they have absolutely no absorption. These tiles have square, oblong, hexagonal and octagonal shapes in sizes from 1½ in. squares to 6 in. squares.

CHART OF FLINT COLORS



Flint Floor Tile Design No. 582

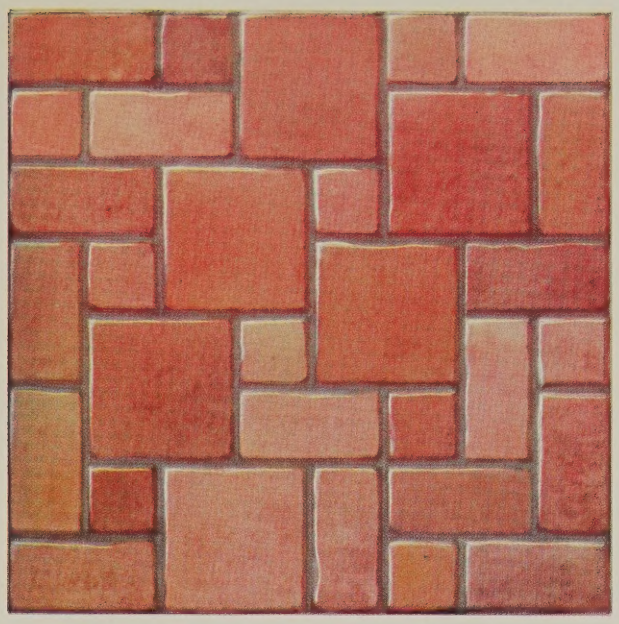
This design illustrates 4¼ x 4¼ Flint floor tiles in green and celadon providing a floor which would be attractive and at the same time extremely serviceable.



Flint Floor Tile Design No. 583

A floor design incorporating 6 x 6 and 6 x 3 Flint tile units using colors chocolate, red and salmon. This very attractive pattern can be carried out in many other combinations of Flint floor tile colors.

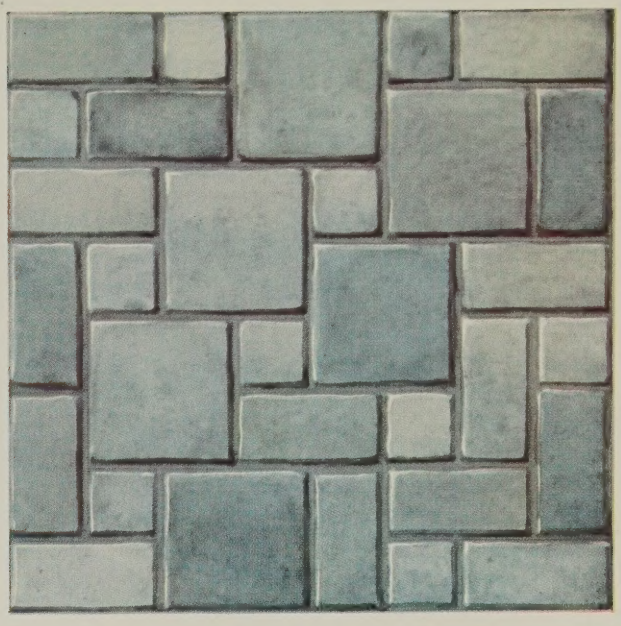
MOSAIC IRONSTONE AND BLUESTONE FLOOR TILES



Ironstone Floor Design No. 534

Here is a harmonious blending of various shades of red, tan and buff. The sizes indicated are 6 x 6, 6 x 3 and 3 x 3.

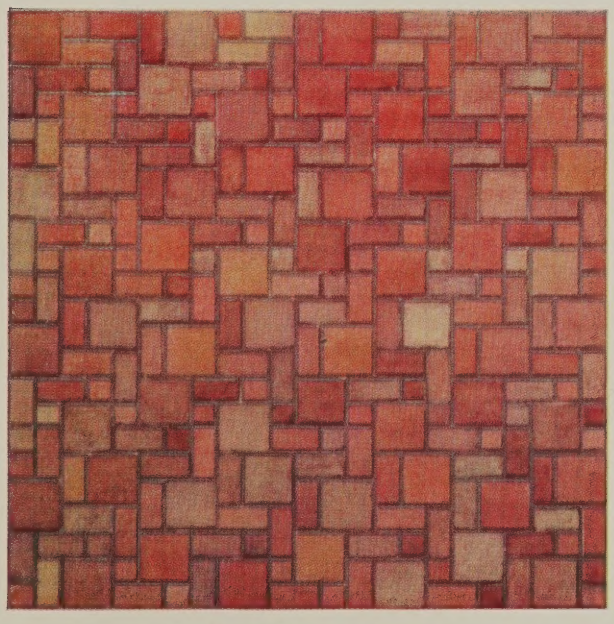
Mosaic Ironstone Tiles are unusually hard, plastic made tiles. Unglazed, they reproduce floors of the true, old-time, craftsmanlike character. The colors in which they come are soft tones of red, brown, tan and buff. They are available in sizes up to 12 x 12, and are recommended for floors in libraries, large living-rooms, billiard-rooms, porches, vestibules and wherever extraordinary durability is required.



Bluestone Floor Design No. 535

A most attractive floor in several shades of blue, green and gray. The illustration shows sizes 6 x 6, 6 x 3 and 3 x 3.

Mosaic Bluestone Tiles have the same characteristics and qualities as are possessed by Mosaic Ironstone Tiles. Due to the fact that they are a superior type of unglazed floor tiles, they are extremely hard and durable and thus are ideal for floors in vestibules, entrances and spaces where permanence and beauty are desired. In soft blue, green and gray shades, charming combinations may be made with the more colorful Faience. Sizes up to 12 x 12.



Ironstone Mosaics, Design No. 1832-I

A random pattern of various reds, tans and buffs. The sizes are 2 x 2, 2 x 1 and 1 x 1.

Bluestone Mosaics, Design No. 1832-J

A combination of pleasing blues, greens and grays in the following sizes: 2 x 2, 2 x 1 and 1 x 1.

Ironstone and Bluestone Mosaics are of the same material and have the same characteristics as the larger units of these tiles described above. They are available in the same soft colors—reds, tans, buffs, blues, greens and grays. The sizes in which they are furnished are 2 x 2, 2 x 1 and 1 x 1. They come mounted on paper to be applied like Ceramic Mosaics.
